

# Exceed Expectations: The Volvo XC90 Plug-in Hybrid — Volvo's Flagship SUV

Responsible choices are a measure of character. The *Volvo XC90 Plug-in Hybrid (PHEV)* stands as a powerful statement of what it means to lead with responsibility. As Volvo's flagship SUV, it represents the brand's highest standard of thoughtful design, intelligent engineering, and complete commitment to safety — true to the values that have defined Volvo for generations.

The XC90 PHEV offers the smart benefits of electric driving with the dependable reach of hybrid technology. With up to 77 kilometers of pure electric range, it is ideal for daily journeys that deliver quiet, efficient performance.

And when distance calls, the 2.0L 4-cylinder petrol engine provides confidence, ensuring drivers can exceed the distance with ease.

Inside, the XC90 blends comfort and protection in a way that reflects Volvo's enduring principle that design serves safety first. The spacious cabin features Nappa leather seating, genuine wood and aluminum décor, and a freestanding center display — all arranged with clarity and purpose. These features are not just about aesthetic refinement; they are ergonomically placed to support driver focus, reduce distraction, and enhance both comfort and safety.

Every element of the XC90 is designed to promote Volvo's vision of *Zero Collisions* — a vision of safer roads for all. This is the spirit of the Volvo *Being Alive* campaign, which champions a culture of safety that goes beyond cars and their passengers to embrace a wider responsibility toward people and communities. The XC90's complete suite of safety features — including Pilot Assist, collision avoidance systems, Blind Spot Information System (BLIS), intersection autobrake, and 360° camera — works quietly in the

background to protect what matters most: the lives of every person on the road.

The XC90 Plug-in Hybrid is more than the pinnacle of Volvo's SUV design — it is a smart, safe choice for those who value thoughtful progress. For individuals who look beyond themselves and make decisions that benefit everyone who shares the road, the XC90 is a vehicle that truly helps them lead responsibly and exceed expectations.

"The Volvo XC90 Plug-in Hybrid is more than a vehicle that helps us exceed distance through

intelligent hybrid technology — it is a symbol of how we, as leaders and individuals, can exceed the bar of responsibility. It represents our commitment to go beyond expectations, to care for people, and to drive meaningful change on the road and in society," says Maria Fe Perez-Agudo, Vice-Chairman, President, and CEO of Hariphil Asia Resources, Inc., official distributor of Volvo Cars in the Philippines.
