

BUILDING FOR TOMORROW

“We are building not only for today; we are building also for tomorrow.”

*President Ferdinand Marcos Jr.
2025 State of the Nation Address*

From education and manpower development, to health, to farms and food security, to modernized government services, to infrastructure, to energy security, the Marcos administration is investing not only to make the lives of Filipinos better today, but also to build the future they have always longed for.

LABOR, EDUCATION AND HEALTH

Even as unemployment free education under Barangay Child has gone down to the expanded Development Centers or below 4%, the DOLE, scholarship programs of “Bulilit Centers” DTI, DSWD, DOT and SUCs and TESDA. The to provide children Academic Recovery and access to early education. To support other agencies continue Accessible Learning program is being the growing demands of livelihood implemented to bridge the public-school system, more than opportunities; provide learning gaps and 16,000 teaching and capital for micro, small provide free academic positions have been and medium intervention to enterprises. Education struggling students. made available, and the hiring system for More and more been allocated for the teachers has been made students are getting establishment of easier.

INFRASTRUCTURE AND TRANSPORTATION

Nationwide, investments in infrastructure are leading to better connectivity, providing better service and enhancing mobility. Among these are:

- The North-South Commuter Railway, Metro Manila Subway, Bataan-Cavite Interlink bridge, SLEX extension to Tiaong, Quezon, PNR rehabilitation and extension to Quezon and Bicol region
- Mindanao Transport Connectivity Improvement Project
- Return of the Love Bus with fares
- Upgraded LRT and MRT with 50% discounts for senior citizens and students.

SERVICES AT THE TAP OF ONE’S FINGER

Through the **eGov PH Super App**, Filipinos can now access more than 40 government services, including getting permits, licenses, renewing IDs and registrations with the tap of their fingers. Not only has this sped up government services and brought them closer to the people, it has also eliminated opportunities for corruption. The **National Broadband Plan Phase 2** is now connecting thousands of public schools and government offices to reliable high-speed internet, laying the groundwork for truly transparent and efficient governance.

WORK NOT YET OVER

A lot may have been achieved in the last three years, but to the President, **“the work is not yet finished ... [and] we need to exert twice the effort to sustain our progress.”** Because as he himself pointed out: “Nagpupundar ... tayo para sa kinabukasan.”

Funds have also been Philhealth’s Yaman ng Kalusugan Program teachers for overtime (YAKAP) and overload. With Philhealth’s Yaman ng Kalusugan Program (YAKAP), outpatient services

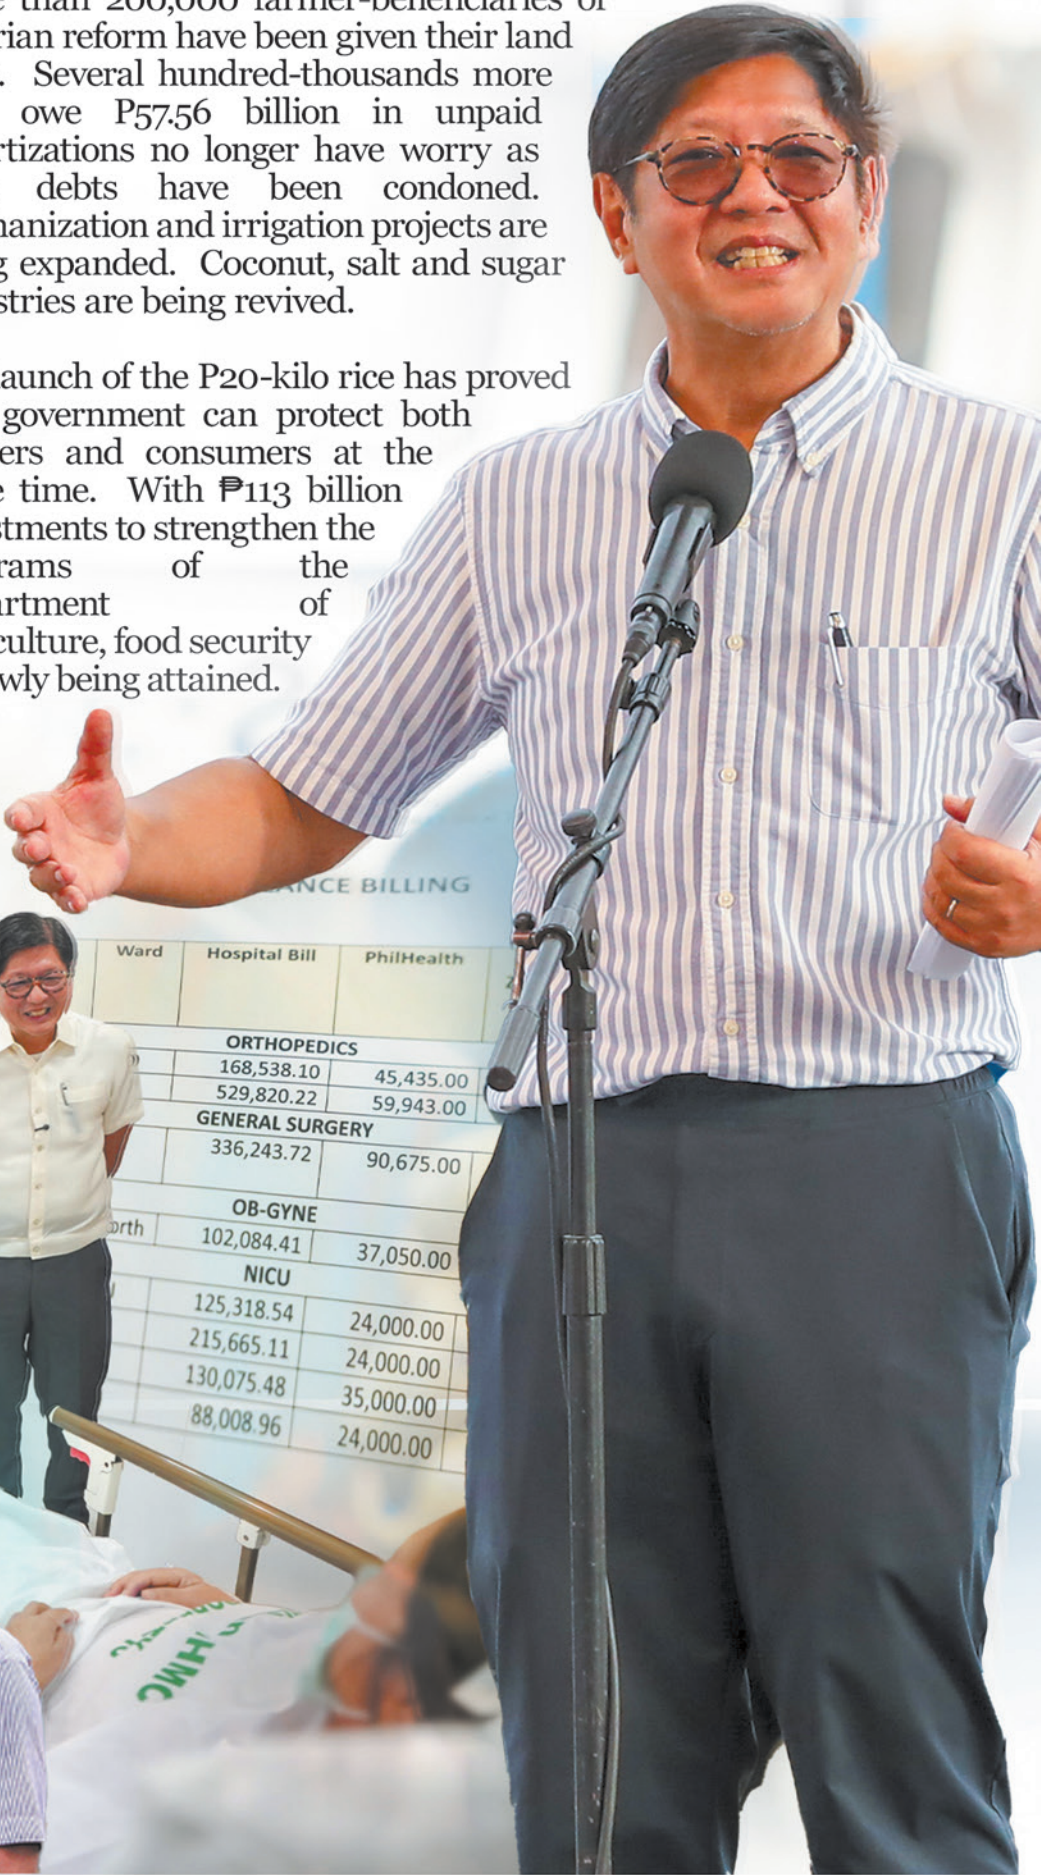

To enhance community access to healthcare, the laboratory and billing policy, Filipinos administration is also screening tests, and who get hospitalized expanding Bagong essential medicines are won’t have to pay a Urgent Care and available for free to single peso in hospitals Ambulatory PhilHealth members. operated by the Department of Health. The program integrates PhilHealth and other medical-assistance funds to cover all medical and hospital expenses of patients.

FARMERS AND FOOD SECURITY

More than 200,000 farmer-beneficiaries of agrarian reform have been given their land titles. Several hundred-thousands more who owe P57.56 billion in unpaid amortizations no longer have worry as their debts have been condoned. Mechanization and irrigation projects are being expanded. Coconut, salt and sugar industries are being revived.

The launch of the P20-kilo rice has proved that government can protect both farmers and consumers at the same time. With **₱113 billion** investments to strengthen the programs of the Department of Agriculture, food security is slowly being attained.
