Typhoons could slow PHL growth

THE PHILIPPINE ECONOMY could face stronger inflationary pressures and slower growth as increasingly frequent and severe typhoons disrupt supply chains and farm production, the International Monetary Fund (IMF) said.

“The Philippines is highly exposed to natural hazards, particularly typhoons, which are the most frequent and costliest climate shocks in the country,” the IMF Regional Office for Asia and the Pacific said in a Facebook post. “These events represent supply shocks, creating inflationary pressure and reducing economic activity.”

The IMF estimated that a Category 5 storm could raise headline inflation by

0.4 percentage point (ppt) and food inflation by 0.7 ppt, based on regional data from its latest Article IV consultation with Manila.

Super Typhoon Ragasa, locally named Nando, was one such storm that battered the country late last month, causing floods and an initial P1.38 billion in agricultural damage.

Data from the Department of Agriculture showed that the southwest monsoon and typhoons Mirasol, Nando and Opong have caused P7.71 billion in combined losses. Farmers and fisherfolk lost 472,701 metric tons in production and 205,016 hectares of farmland.

The IMF said such weather shocks could drag agricultural labor productivity by as much as 2.5% and shave 0.4 ppt off economic growth, with estimated damage amounting to about 0.2% to 0.3% of gross domestic product (GDP).

Inflation accelerated to 1.7% in September from 1.5% in August, the fastest in six months, the Philippine Statistics Authority said. While slower than 1.9% a year earlier, the pickup reflected higher food prices after recent typhoons.

The agency said vegetable prices rose 19.4% in September, up from 10% in August — the steepest increase since January. Food inflation climbed to 0.8% from 0.6% in the previous month.

Average inflation this year stands at 1.7%, matching the Bangko Sentral ng Pilipinas’ (BSP) full-year target but slightly above the IMF’s 1.6% forecast.

The economy expanded by 5.4% in the first half, slower than last year’s 6.2% but in line with the IMF’s full-year outlook.

Economy Secretary Arsenio M. Balisacan said growth might soften further in the third quarter due to typhoon-related disruptions but could still meet the lower end of the government’s 5.5% to 6.5% goal. The third-quarter GDP data will be released on Nov. 7.

The IMF said monetary authorities should carefully balance inflation con-

trol with the need to support growth after natural disasters. “Post-disaster, monetary policy must carefully weigh trade-offs between anchoring inflation expectations and supporting economic recovery,” it said.

The BSP delivered its fourth straight 25-basis-point (bp) rate cut on Oct. 9, bringing its benchmark rate to a three-year low of 4.75%. It has reduced borrowing costs by 175 bps since August 2024.

“Fiscal policy is central to building climate resilience before disasters strike, to help mitigate the macro impacts of natural disasters,” the IMF added. — **Katherine K. Chan**

PHILIPPINE STAR/NOEL B. PABALATE

PRESIDENT Ferdinand R. Marcos, Jr. (center) witnesses the ceremonial removal of RFID stickers from vehicles equipped with two installed RFIDs during the launch of the One RFID, All Tollways system at the South Luzon Expressway in Calamba City. With him (from left) are Acting Transportation Secretary Giovanni Z. Lopez, Metro Pacific Investments Corp. Chairman Manuel V. Pangilinan, Toll Regulatory Board Executive Director Jose Arturo M. Tugade and San Miguel Corp. President and Chief Executive Officer Ramon S. Ang.

Marcos unveils unified toll collection system

By **Chloe Mari A. Hufana**
Reporter

PHILIPPINE President Ferdinand R. Marcos, Jr. on Tuesday unveiled a unified toll collection system that will let motorists use a single radio frequency identification (RFID) sticker across all expressways in Luzon, a measure aimed at easing congestion, cutting travel time and advancing the government’s digital transport modernization drive.

Speaking at the launch of the One RFID, All Tollways system in Calamba City, Mr. Marcos said the interoperability effort

represents a major step toward a more connected and commuter-friendly road network.

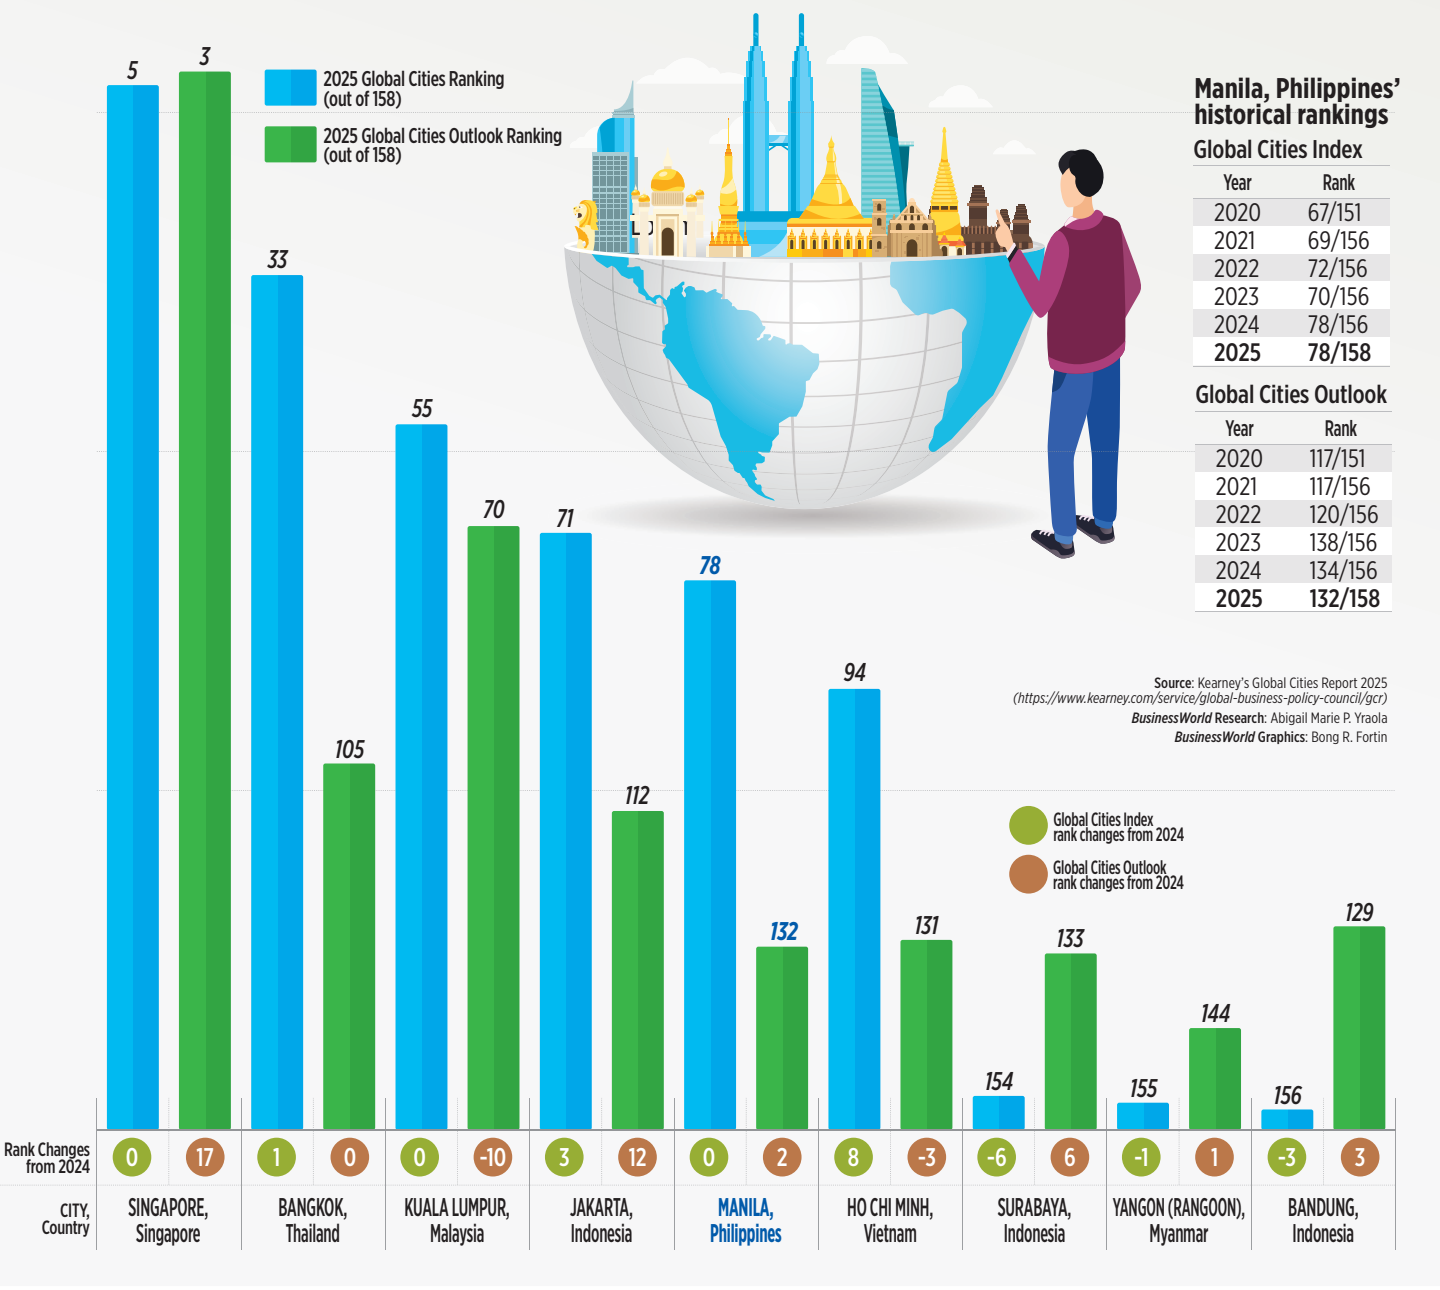

“Starting today, only one RFID sticker will be needed for all our toll expressways across Luzon,” the President said in Filipino, according to a transcript from his office. “Group and fleet accounts will also be launched next year.”

Under the system, motorists can use a single RFID sticker and account — whether from San Miguel Corp.’s Autosweep or Metro Pacific Tollways Corp.’s EasyTrip — across all toll roads in Luzon, eliminating the need for multiple accounts and reducing bottlenecks at toll plazas.

Manila steadies in global cities ranking

Manila held its 78th place out of 158 cities in the 2025 edition of the Global Cities Report by global consulting company Kearney. Meanwhile, its position in the Global Cities Outlook went up two places to 132nd from 134th in the previous edition. The report measures the extent to which cities can attract, retain, and generate global flows of capital, people, and ideas. The Cities Ranking assesses the current performance of a city while the Outlook Ranking projects potential future performance.

Maynilad sets final IPO price at P15 per share after investor feedback

By **Alexandria Grace C. Magno**

MAYNILAD WATER SERVICES, INC. has set the final offer price for its initial public offering (IPO) at P15 per share, matching the upper end of its revised price range, according to a notice from the Philippine Stock Exchange (PSE).

The final price was reduced from the earlier maximum of P20 per share after feedback from cornerstone investors including the United Kingdom’s Mobilist, the International Finance Corp. (IFC) and the Asian Development Bank (ADB).

The offer, expected to be the biggest listing in the Philippines this year, has drawn strong demand from institutional investors.

The IFC and ADB are considering investments of \$100 million and \$145 million, respectively. Other investors expressing interest include Robeco Switzerland Ltd. with up to \$20 million, as well as Abrdn Malaysia Sdn. Bhd., Maven Investment Partners Ltd. - Hong Kong Branch, Maybank Asset Management Singapore Pte. Ltd. and QRT Master Fund - Torus Fund SP.

Maynilad will offer as many as 1.66 billion common shares to the public, including 24.9 million primary shares allocated for First Pacific Co. Ltd. It will also have an overallotment option of as many as 249.05 million shares and an upsize option of 354.7 million secondary shares, which could bring the total offer to 2.29 billion shares.

Philippines should forge more trade pacts to cushion US tariff impact, says HSBC

THE PHILIPPINES should pursue more free trade agreements (FTAs) to shield its exports from the fall-out of the US’ widening trade war, HSBC Global Investment Research said in a report.

“The Philippines will need to reach out to more and larger countries to potentially decouple itself from the US and make its exports more resilient,” HSBC economists said.

The call followed the latest round of tariffs imposed by US President Donald J. Trump on several global trade partners, including a 19% levy on Philippine goods — the same rate applied to Indonesia, Cambodia, Malaysia and Thailand.

While the Philippines’ average tariff rate remains lower than some of its peers, HSBC warned that the situation

could deteriorate once Washington finalizes additional sectoral tariffs.

“Malaysia and the Philippines are not out of the woods,” the bank said. “With sectoral tariffs on electronics potentially soon, Malaysia and the Philippines will likely follow suit and see their effective tariff rate rise. We believe it’s just a matter of when.”

Electronics and semiconductors make up more than half of the Philippines’ total exports. Manila has been lobbying Washington to exclude these products from its tariff list, but talks have yet to yield results.

A United Nations Development Programme report last month estimated that US tariffs could reduce Philippine exports to the US by 13.1%. The US remains the Philippines’ biggest export destination.

“But US demand, as lucrative as it may be, is not as dependable as it was before,” HSBC said. “The past few months have shown us that trade policy can change in an instant.”

The report also noted that the Association of Southeast Asian Nations’ (ASEAN) tariff differential with China has widened since Mr. Trump’s “Liberation Day” trade policies took effect on Aug. 7.

The Philippines’ effective tariff rate gap with China rose to 27.5% from 14.1% in April.

HSBC said expanding trade pacts could help the Philippines and other ASEAN members tap new export markets and reduce their dependence on the US.
